

Nestlé Nutrition – Gerber Foods

Projects:

*Air Pressurization / ACH Study
Microbiology Lab HVAC Design
Plant Waste Water Design
Structural Engineering Analysis*

Location: Fort Smith, Arkansas

Completion: Most Recent - January 2013

Pinnacle Energy Services' engineers have provided

consulting on a variety of projects at the 900,000SF Gerber Plant owned by Nestlé Nutrition, a world leader in infant nutrition, healthcare nutrition, performance nutrition and weight management.

Projects have included a large cooking area Airflow Study, HVAC design of a Microbiology Laboratory used for QA/QC analysis, providing Engineering Design and Management Services for both Process and Sanitary Wastewater systems serving their new \$90M+ dry cereal expansion line. Most recently we have provided Engineering Management Services for A Structural Analyses Study in support of a large piping replacement project in the plant.
